

Targeting for drilling 2021

Mag HR, IP, Geochem

- Two (2) drill holes (1,311 m) completed on Maritime-Cadillac
- Seven (7) drill holes (1,810 m) completed on Samson – Golden Delilah
- Geophysical and geochemical surveys conducted on La Peltrie and Gaudet-Fenelon
- Stripping completed on a new gold showing on Lewis
- Assay results expected in early December for all these programs
- Several drilling campaigns to come in the winter of 2021 with a minimum of 5,000 metres
