

Midland-SOQUEM Alliance in the Labrador Trough

2022-2023 Field Work Results

Legend

Field work

- 2023 Discovery

Rock samples 2022-2023

Cu ppm

- < 300
- 300 - 1,000
- 1,000 - 5,000
- 5,000 - 10,000
- >10,000

- Historical rock samples
- Boulder
- 2012 Drillhole Virginia

Mining claims and restrictions

- Midland-SOQUEM claims
- Specific agreement for conservation (exploration allowed)

Geology

Montagnais Group

- Aphyric gabbro, olivine gabbro, quartz gabbro, locally pegmatic

Murdoch Formation

- Mafic pyroclastic rock (Tuf, lapillis Tuf)
- Magnetic Basalt, Chloritic Schist
- Basalt, massive and pillowed
- Grey mudstone and siltite
- Magnetite bearing Dolomite interbedded with chert

Baccus Formation

- Greywacke interbedded with Conglomerate, turbidite

Denault Formation

- Grey stromatolitic, laminated Dolomite interbedded with grey and black Chert

Projection System:
Universal Transverse Mercator NAD83 Zone 19
