

New Kuiper Copper Project

2024 New Cu Mineralized Boulders

C1456561. Dolomite boulder with intense tremolite calco-silicate alteration (skarn type) and pervasive mineralization of chalcopyrite-magnetite. **5.25% Cu** (selected grab sample)

C1456560. Same dolomite boulder with intense tremolite calco-silicate alteration (skarn type) and pervasive mineralization of chalcopyrite-magnetite. **1.75% Cu** (selected grab sample)

C1456050. Bedded mafic boulder with actinolite calco-silicate alteration (skarn type) and mineralization of chalcopyrite-magnetite. **1.14 % Cu** (selected grab sample).
