Corporate Presentation

August 2026

Forward-Looking Statements

- **Safe Harbour Statement**

Certain statements in this presentation constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 and Canadian securities legislation. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company, or other future events, including forecast production, earnings and cash flows, to be materially different from any future results, performances or achievements or other events expressly or implicitly predicted by such forward-looking statements. Such risks, uncertainties and other factors include, but are not limited to, factors associated with fluctuations in the market price of precious metals, mining industry risks, recent operating losses, uncertainty of title to properties, risk associated with foreign operations, environmental risks and hazards, proposed legislation affecting the mining industry, litigation, governmental regulation of the mining industry, properties without known mineable reserves, uncertainty as to calculations of reserves, mineral deposits and grades, requirement of additional financing, uninsured risks, competition, dependence on key management personnel, potential volatility of market price of the Company’s common shares, dilution and certain anti-takeover effects. Such information contained herein represents management’s best judgment as of the date hereof based on information currently available. The Company does not intend to update this information and disclaims any legal liability to the contrary.

- **Cautionary Note concerning estimates of Measured, Indicated and Inferred Mineral Resources**

This presentation uses terms that comply with reporting standards in Canada and certain estimates are made in accordance with Canadian National Instrument 43-101 (“NI 43-101”). NI 43-101 is a rule developed by the Canadian Securities Administrators that establishes Canadian standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. These standards differ significantly from the requirements of the U.S. Securities and Exchange Commission (“SEC”), and mineral resource information contained herein may not be comparable to similar information disclosed by United States companies. This presentation uses the terms “measured mineral resources”, “indicated mineral resources” and “inferred mineral resources” to comply with reporting standards in Canada. We advise United States investors that while such terms are recognized and required by Canadian regulations, the SEC does not recognize them. United States investors are cautioned not to assume that any part or all of the mineral deposits in such categories will ever be converted into mineral reserves under SEC definitions. These terms have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. Therefore, United States investors are also cautioned not to assume that all or any part of the “measured mineral resources”, “indicated mineral resources” or “inferred mineral resources” exist. In accordance with Canadian rules, estimates of “inferred mineral resources” cannot form the basis of feasibility or other economic studies. It cannot be assumed that all or any part of the “measured mineral resources”, “indicated mineral resources” or “inferred mineral resources” will ever be upgraded to a higher category.

Midland Exploration Summary

- ◉ Prospect Generator / Joint-Venture Model;
- ◉ Quebec focus, exploring for gold and critical minerals (Cu-Ni-Li);
- ◉ 124.8 million shares outstanding;
 - ◉ Management: 13%, Institutions: 50%, Retail: 37%
- ◉ 144.1 million shares fully diluted (incl. 11.8M warrants and 7.5M options);
- ◉ No debt, \$14.0 million in cash in the treasury;
- ◉ \$5.1M private placement by Centerra in July 2025 (holds 9.9%);
- ◉ Important agreements with: BHP, Rio Tinto, Barrick, Agnico Eagle, Centerra, Fresnillo (2), Wallbridge, Electric Elements, SOQUEM, Abcourt and NMEF;
- ◉ \$12.0M of exploration (MD \$9.75M – Partners \$2.25M) in 2026, incl. more than 15,000 m of drilling.

Share Structure and Financial Information

Share Capitalization

Common Shares Outstanding (basic)	124,802,909
Options	7,510,000
Warrants	11,829,456
Fully-Diluted Shares Outstanding	144,142,365

Current Assets & Revenue (\$CAD)

Current assets (as of March 31, 2025)	\$9,000,000
Approximate 2026 Revenue (mgmt. fees + cash payments + tax credits)	\$500,000

2026 Exploration Budget + Admin (\$CAD)

Annual General and Administration Costs	\$1,500,000
Partner Funded	\$2,250,000
Sole-Funded	\$9,750,000
Total 2026 Exploration Expenditures	\$13,500,000

Share Ownership Structure

Significant Shareholders

- Adrian Day Asset Management and Euro Pacific Gold Fund;
- Quebec Pension Fund (CDPQ);
- Other Quebec-based institutional funds: SIDEX, FTQ, SDBJ, Desjardins Venture Capital; NQ Investissement;
- Centerra and BHP;
- Top 10 shareholders own more than 60%.

- JOGMEC (2) : *Ytterby, Pallas*
- Zincore : *Gatineau Zn*
- Donner (3) : *Valmond, Adam, Samson*

Historical Exploration Work

Midland		Partners		Total
\$50M	+	\$83M	=	\$133M
(38%)		(62%)		

Recent Highlights

- ◉ Private placement completed (\$5.3M) including new strategic investors;
- ◉ IP survey completed on Caniapisc Au Project with several new anomalies (drilling targets);
- ◉ Drilling program on Jouvex and Casault gold projects (6,000 m);
- ◉ New high-grade lithium-cesium intersections with Rio Tinto on Galinée;
- ◉ New agreement with Barrick on Lewis project (up to \$12.0M and \$750,000 cash over 7 years);
- ◉ New gold discoveries on Caniapisc Au project;
- ◉ New high-grade Cu-Au-REE discoveries on Labrador Trough JV SOQUEM;
- ◉ Acquisition of the Kan gold property and Labrador Trough Cu-Au properties.

Gold Anomalie (Rocks) Summer 2025

- C567958 – 14.3 g/t Au – 60*50*15cm pancake block: Amphibolite, muscovite, biotite, good schisto, **0.5% very finely disseminated pyrite.**
- C567775 – 4.67 g/t Au and 2.3% Zn – block 60*60 Garnet amphibolite, red-orange, Calco-silicate rock, strongly altered chlorite and calcite, 4% pyrite, 1% pyrrhotite, chalcopyrite?
- C567856 – 3.29 g/t Au – Very angular block 1x0.7x0.5m. Foliated amphibolite, V3? With Qz veins/veinlets. Orange Qz vein about 6cm thick with 2%Py and 0.5-1% Ga? Very fine bluish mineral. 0.5% Py in the host rock.

Gold Anomalies (Rocks) Summer 2025

- **C567794 – 3.3g/t Au** – block 0.6x0.5m
Sediment rich in quartz (alt?) bedded appearance with biotite and other apple green color phyllosilicate (fushite), with disseminated sulfides, 0.5% chalcopyrite, 6% pyrite.
- **C567805 – 2.60 g/t Au** – 0.5m block of mineralized, rusty, strongly mag
- **C567765 – 2.21 g/t Au** – Block 0.4x0.5m
Metasediment superimposed by strong calcosilicate alteration, Alteration in the form of regular pervasive replacement, heterogeneous with clusters and pockets of garnet or calcite. Fine disseminated pyrrhotite 2%.

sample results)

Fieldwork – Soils To Be Investigated/Excavated

- Approximately fifteen soils (>25 ppb) to be excavated (white circles).
- Soils >10 ppb Au will be inspected.
- 3-4 days of work with 3 teams.

Fieldwork – Soils To Be Investigated/Excavated

Nine (9) EM anomalies to investigate
(black circles)

-2-3 days of work with 3 teams

2026 Soil Geochemistry Survey:

-A geochemical survey of approximately **± 600 soil samples** will be conducted in targeted areas across the entire property. (lines at 400m intervals, samples at 200m intervals).

-Targets: high MAG fold in the center and extension to the north; low MAG and high MAG areas elsewhere on property; details on EM targets and 2025 anomalous soils.

-**Budget: \$250,000**; 4 people, ±11 days.

# Why Choose Midland Exploration

- Strong management and technical team;
- Excellent share structure and well-funded with more than \$14.0M in cash in the treasury. More than \$12.0M (MD \$9.75M – Partners \$2.25M) in exploration in 2026 with min. of 15,000 metres of drilling;
- \$5.1M private placement with Centerra July 2025 (holds 9.9%);
- Attractive and successful JV business model, focus in Quebec;
- Important agreements with Rio Tinto, BHP, Barrick, Agnico Eagle, Centerra, Fresnillo (2), Wallbridge, SOQUEM, Electric Elements, Abcourt and NMEF;
- New gold and base metals discoveries with excellent potential for major world class deposit;
- **New significant Cu-Au discoveries East of Detour mine, new high-grade Au and Cu-Au discoveries in the James Bay and Labrador Trough. Li-Cs discoveries with Rio-Tinto in the James Bay.**

# Thanks - Merci beaucoup!!
